

Monkyfi
— GET AI POWER —

Monkyfi helps telecommunications and digital infrastructure companies turn operational data and workflows into AI-powered intelligence, automation, and better decisions — built on real telecom operations experience, not generic AI hype.

SOLUTIONS — CONSULTING FIRST, AI PILOTS NEXT, A SCALABLE PLATFORM AHEAD

AVAILABLE NOW

01 • Monkyfi Connect

AI & Telecom Consulting

Practical consulting to identify operational opportunities, improve service delivery, and build a sequenced roadmap for AI adoption.

PILOT • COMING SOON

02 • Monkyfi Atlas

Agentic AI for Network Operations

An AI copilot for NOC teams — incident analysis, knowledge retrieval, event correlation, and recommended next actions.

COMING SOON

03 • Monkyfi Sentinel

Subsea Cable & Backbone Resilience

AI-powered intelligence for critical digital infrastructure — risk analysis, capacity insight, resilience planning.

MONKYFI CONNECT — SIX FOCUSED ENGAGEMENTS

01

AI Readiness Assessment

Where you stand across 5 readiness dimensions before spending on AI.

02

Telecom Digital Transformation

Phased roadmap across CX, network ops, systems, and ways of working.

03

Service Delivery Optimization

Map order-to-activation or fault management to find real bottlenecks.

04

Network Operations Automation

Reduce alarm noise and manual toil, with rollback guardrails built in.

05

Data Readiness for AI

Confirm your data can support the AI use case before it fails in pilot.

06

AI Strategy & Advisory

A board-ready, sequenced AI adoption plan with build-vs-buy guidance.
